

The Cervical and Thoracic Spine Series 1 Volume 3

The Cervical and Thoracic Spine double DVD is a detailed, fundamental guide to examination and treatment of the neuromusculoskeletal system and the structures involved in this anatomical area. This interactive DVD follows a clear pattern initially looking at the anatomy of the area, followed by detailed sections on observations, the most commonly used examination techniques, screening other structures, treatment progressions and exercise therapy. The emphasis of this DVD is on developing the viewer's manual skills and to provide a reference of all the commonly used examination and treatment techniques.

The DVD also includes detailed case studies to assist the development of clinical reasoning skills, expert 'Top Tips' study notes and detailed radiology of the Cervical and Thoracic Spine. The content has been developed using an international Consensus Development System© and contains input from senior lecturers from over 20 international recognized universities from Europe and North America.

This double DVD contains 8 hours of material, is filmed using Multi-Angle Vision© and comes with a complete interactive workbook and online examination system to provide the reader with the complete e-learning solution for their ongoing professional development.

The DVD is designed for use by anyone requiring to identify and assess clinical problems in this area, whether student or clinician. The DVD is also designed as a resource of ongoing professional development for all suitably qualified clinicians.

Menu System

The Cervical and Thoracic Spine

- 1.0 Introduction
- 2.0 Observation of Posture
 - 2.1 Introduction to Posture Examination
 - 2.2 Observation – Posterior
 - 2.3 Observation – Saggital
 - 2.4 Observation – Anterior
- 3.0 Screening Other Joints
 - 3.1 Shoulder
 - 3.2 Lumbar
 - 3.3 Elbow
 - 3.4 Wrist
- 4.0 Surface Anatomy and Palpation
 - 4.1 Cervical Spine Prone
 - 4.2 Cervical Spine Supine
 - 4.3 Thoracic Spine
- 5.0 Motion Assessment
 - 5.1 Active Movement
 - 5.1.1 Introduction and Overpressure
 - 5.1.2 Cervical Spine – General
 - 5.1.3 Cervical Spine – Specific
 - 5.1.4 Thoracic Spine – General
 - 5.1.5 Thoracic Spine – Specific
 - 5.1.6 Ribs
 - 5.2 PPIVM Cervical Spine
 - 5.2.1 Introduction
 - 5.2.2 Mid and Lower Cervical Spine
 - 5.2.3 Upper Cervical Spine
 - 5.3 PPIVM Thoracic Spine
 - 5.3.1 Introduction
 - 5.3.2 Mid and Lower Thoracic Spine
 - 5.3.3 Upper Thoracic Spine
 - 5.4 PAIVM Cervical Spine
 - 5.4.1 Central Postero-Anterior Movement
 - 5.4.2 Unilateral Postero-Anterior Movement
 - 5.4.3 Transverse Movement
 - 5.4.4 Antero-Posterior Movements
 - 5.5 PAIVM Thoracic Spine
 - 5.5.1 Central Postero-Anterior Movements
 - 5.5.2 Unilateral Postero-Anterior Movements
 - 5.5.3 Transverse Movements
 - 5.6 Accessory Motion of the Ribs
- 6.0 Neurological Examination
 - 6.1 Introduction
 - 6.2 Neurological Conduction
 - 6.2.1 Myotomes
 - 6.2.2 Sensation
 - 6.3 Neural Tissue Provocation Tests
 - 6.3.1 Median Nerve Elongation Tests
 - 6.3.2 Ulnar Nerve Elongation Tests
 - 6.3.3 Radial Nerve Elongation Tests
 - 6.3.4 Nerve Palpation
 - 6.3.5 Thoracic Neural Tissue Provocation
- 7.0 Cervical Vascular Insufficiency
 - 7.1 Introduction
 - 7.2 Testing

- 8.0 Instability Tests
 - 8.1 Introduction
 - 8.2 Tectorial Membrane
 - 8.3 Transverse Ligament of the Dens
 - 8.4 Alar Ligaments
- 9.0 Muscle Assessment
 - 9.1 Cervical Isometric Strength
 - 9.2 Thoracic Isometric Strength
 - 9.3 Muscle Length Tests
- 10.0 Manual Therapy Joint Techniques – Cervical Spine
 - 10.1 Introduction
 - 10.2 Central Postero-Anterior Mobilisation
 - 10.3 Unilateral Postero-Anterior Mobilisation
 - 10.4 PPIVM Rotation Mobilisation
 - 10.5 Unilateral Antero-Posterior Mobilisation
 - 10.6 Lateral Glide Mobilisation
 - 10.7 PPIVM Side Flexion Mobilisation
 - 10.8 Manual Traction
 - 10.9 Transverse Glide Mobilisation
 - 10.10 Treatment Progression: Unilateral PA Mobilisations
 - 10.11 Postero-Anterior Mobilisation in Sitting
 - 10.12 PPIVM Mobilisations in Sitting
- 11.0 Manual Therapy Joint Techniques – Thoracic Spine
 - 11.1 Introduction
 - 11.2 Central Postero-Anterior Mobilisation
 - 11.3 Unilateral Postero-Anterior Mobilisations
 - 11.4 Passive Physiological Mobilisation
 - 11.5 Rib Joint Mobilisations
- 12.0 Manual Therapy – Neural Mobilisation
- 13.0 Exercise Therapy
- 14.0 Case Study: Cervicogenic Forearm and Thumb Pain
 - 14.1 Introduction and Subjective Findings
 - 14.2 Analysis of Subjective Findings
 - 14.3 Physical Examination Part One
 - 14.4 Physical Examination Part Two
 - 14.5 Physical Examination Part Three
 - 14.6 Analysis of Findings
 - 14.7 Treatment Part One
 - 14.8 Treatment Part Two
- 15.0 Top Tips
 - 15.1 Useful Spinal landmarks
 - 15.2 Differentiating postural and structural scoliosis
 - 15.3 Identifying lower cervical spine vertebral levels
 - 15.4 Assessment of rotation at C1/2
 - 15.5 How to assess accessory motion of the first rib
 - 15.6 Alternative methods to assess central PA in the Thoracic Spine
 - 15.7 Interpretation of Myotome assessment
 - 15.8 Test for C3/4 reflex
 - 15.9 Techniques to improve rib mobility
 - 15.10 Alternative Methods of applying cervical side flexion mobilisation
 - 15.11 How to incorporate neural mobilisation into exercise therapy
- 16.0 Extras
 - 16.1 Radiology of Cervical and Thoracic Region
- 17.0 Website Link
